

SELECTIVE SERVICE ENROLLMENT

Males aged 18 through 25 must register for selective service within 30 days of arrival.

What is selective service?

The Selective Service System requires that all of America's young men be registered in Selective Service. This system is meant to: "provide our Nation with a structure and a system of guidelines which will provide the most prompt, efficient, and equitable draft possible if the country should need it. America's leaders agree that despite the success of the All-Volunteer Force, registration with Selective Service must continue as a key component of national security strategy."
